

# SYMMETRIC

## Series 3

Symmetrical electric strikes are the most common on the market. They are **100% reversible** and feature an adjustable keeper.

DC models are equipped with electronic protection in order to prevent damages to your access control system. This also represents an advantage for the installer as the connection is not polarized.

Featuring a wide variety of functions and voltages, these strikes quickly unlock standard doors through low power consumption. Now featuring our special **multi-voltage coil**, a new symmetric model that can be 12V ac/dc or 24V ac/dc with only one single switch.
